

Vema TFL Range

Vema TFL Range is designed for heavy duty fire fighting and rescue operations.

Supplier for international
rescue and industrial customers

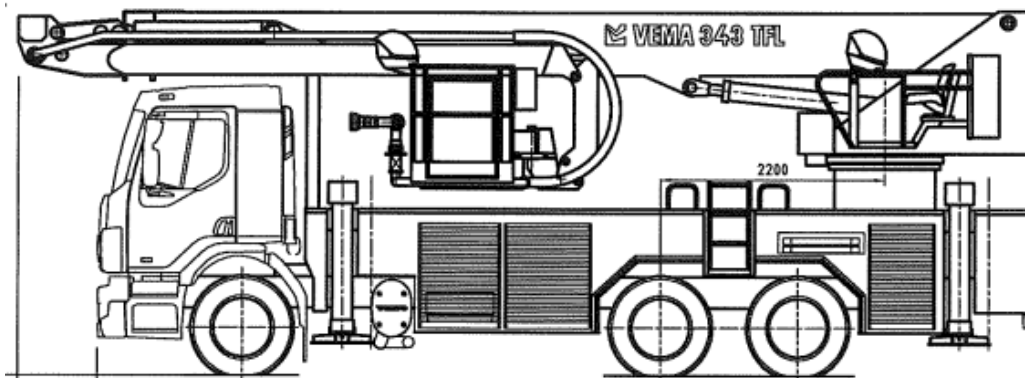

VEMA TFL Range of Fire Fighting Aerials are specially designed for municipal and general industrial fire departments.

Vema TFL range is suitable for people to ascend and descend from the working cage to the ground, in any platform working position.

For fire-fighting operations these models can be equipped with a water pump and a remote-controlled water monitor in the platform, as well as foam & water tanks & foam proportioning systems.

VEMA TFL Range Aerials are mounted onto a commercial standard truck chassis with adequate GVW and wheel bases.

VEMA TFL Range Aerials are engineered in compliance with all related European CEN Safety Requirements, Norms and Standards.
